

PROGRAM OF THE CONFERENCE 22nd May 2018

8:00 - 10:00 – registration

10:00 – Opening speech - Mgr. Jan Fischer, CEO, ENERGY-HUB

Morning Part - Development and Trends In the Energy Sectors in Slovakia

Section I - Real Impact of the Winter Package on the Energy Sector

10:00 – 11:30 – Panel discussion

Hosted by: JUDr. Rastislav Hanulák, Partner, Capitol Legal Group

Introductory presentation: JUDr. Rastislav Hanulák, Partner, Capitol Legal Group

The European Commission's Winter package brings major changes to the electricity market by changing autonomy of electricity transmission system operations. It also brings new challenges to the development of renewable energy and smart technologies. For some it already means new "green religion", for others it represents inevitable trend, for another it is a pure business opportunity. It is necessary to introduce and lead a public debate in Slovakia as it is obvious that the Winter package will not only mean the massive burst of so called alternative energy but also it will challenge development and sustainability of the existing infrastructure. And it won't be for free.

Panellists:

- RNDr. Karol Galek, MSc., member of the National council of the Slovak republic, member of the Economic Affairs Committee
- Ing. Martina Olejníková, representative of Slovakia at European Federation of Intelligent Energy Efficiency Services
- Ing. Stanislav Janiš, Chairman, Slovak Association of Heat Producers
- Mgr. ICLic. Pavol Poláček, LL.M., M.A., partner, AK Poláček and partners
- Mgr. Martin Sliva, PMP, Project Coordinator, OKTE

11:30 – 12:00 – coffee break sponsored by companies Capitol Legal and OKTE

Section II.- Distribution, regulation - new business opportunities

12:00 – 13:30 – Panel discussion

Hosted by: Ing. Dean Brabec, Managing Partner CEE, Arthur D. Little

Introductory presentation: Ing. Dean Brabec, Managing Partner CEE, Arthur D. Little

Energy sectors have been changing in the past years. With than change there must change current players on the market including distribution system operators. What kind of services except energy distribution and energy delivery the current market players provide and will provide on the B2B, B2C a B2G markets?

Panellists:

- Marcel Hominda, Principal, Arthur D. Little
- Ing. Vladislav Jurík, Director, Section of Regulation, Stredoslovenská distribučná
- Mgr. Jerguš Vopálenký, Head of Network Business Development, SPP - distribúcia

13:30 – 14:30 – lunch break

Afternoon part - carbon-free energy

Section III.- Nuclear Power Industry in Central and Eastern Europe

14:30 – 16:00 – Panel discussion**Hosted by: Jan Žižka, Senior Consultant - Energy Specialist, HATcom****Introductory presentation: Petr Závodský, Director Nuclear Power Plants Construction, ČEZ**

The Central European region is one of the few regions in Europe, where the fame of nuclear power is not declining. Slovakia is finalising the construction works on two reactors in Mochovce and Hungary is ready to start the construction of another block in the Paks power plant. It is likely that in the Czech Republic will be made decision on the construction of one or two new reactors at the existing nuclear power plants in Dukovany and Temelín. What is the future of the nuclear power in the energy mix of the Central European countries and does still the construction of new modern nuclear blocks make sense?

Panellists:

- Ing. Zalan Bacs, MBA Deputy Managing Director of Rosatom Central Europe and Director of Rosatom Central Europe Hungarian Branch
- Vítězslav Jonáš, Chairman, Energy Třebíč Region Association
- Ing. Petr Závodský, Director Nuclear Power Plants Construction, ČEZ
- Ing. Roman Zdebor, Director, New Nuclear Sources, Škoda JS

16:00 – 16:30 – coffee break sponsored by Škoda JS

Section IV.- How Can Nuclear Power be supplemented by Renewable Energy?

16:30 – 18:00 – Panel discussion**Hosted by: Ing. Pavel Šimon, CSc., vice-president of Chamber of users and producers of renewable energy / University of Žilina****Introductory presentation: Ing. Pavel Šimon, CSc., vice-president of Chamber of users and producers of renewable energy / University of Žilina**

Slovakia has one of the highest shares of nuclear power in its electricity mix of European countries. It moves the Slovakian energy mix to the position of low-carbon country. However, the rest of the production is largely based on fossil fuels - especially the lignite from Nováky mines. What is the technical and real potential of the full replacement of fossil fuels by renewable energy sources? We will look at this question with Slovak and foreign experts on energy renewable resources.

Panellists:

- Mgr. Jan Fousek, CEO of Association for Energy Accumulation AKU-BAT and member of board of Union of Modern Energy Sector
- René Grebeň, Director, Energie pro život
- Ing. Juraj Novák, Energy Section, Ministry of Economy
- Dr. Ing. Kvetoslava Šoltésová, CSc., Director, Department of Legislation, Methodology and Education, Slovak Innovation and Energy Agency

18:30 Conference conclusions - Mgr. Jan Fischer, CEO, ENERGY-HUB

Conference partners:

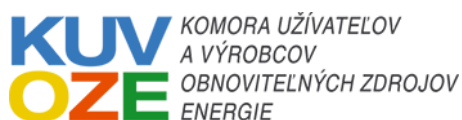

Bronze partner

Arthur D Little
